

MedLife consolidates its top position in Brașov and invests in the expansion of the hospital, as well as in opening a new hyperclinic and a new laboratory

MedLife is the only operator in Brașov providing integrated healthcare services with hyperclinics, laboratories, maternity hospital, paediatrics centre, hospital and pharmacy

2 February 2017, Brașov: MedLife, leader of the private healthcare market in Romania, expands its presence in Brașov and announces the opening of a new hyperclinic and a new laboratory. Thus, by inaugurating these medical units and moving the outpatient care services in the new venue, the MedLife Brașov Hospital expands with 18 beds, with a day hospitalisation regime; currently the unit operates with a total number of 82 beds and 3 operating rooms.

MedLife consolidates thus its top position in Transylvania, as the only private healthcare services operator that provides patients with integrated outpatient services, imaging, laboratory tests, surgical interventions and hospitalisation, under the same roof.

“At the same time with this launch, part of the MedLife Brașov Hospital was freed to include a new hospital section with beds, the purpose of the construction being to render the services more efficient by adding hospital services to the existing fixed costs. We cover a wide range of surgical interventions, and due to the technology we have and our medical team, we can manage an increasing number of interventions of medium and high complexity. For this reason, our ongoing investments are a natural step towards our development in the hospital segment”, said Mihai Marcu, MedLife President and CEO.

The new MedLife Brașov hyperclinic is located in the area of the Railway Station, on the spot formerly occupied by Lidl. It provides locals with investigations and treatments for 32 specialties, among which orthopaedics, general surgery, plastic surgery, pediatric surgery, gynecology, cardiology, diabetes, endocrinology, neurology and ENT. The new unit has 21 consulting rooms for examinations and clinical and paraclinical investigations, three treatment halls and two functional exploration rooms. The medical team consists of 95 physicians and support staff.

The new laboratory, the fourth unit in the MedLife Brașov portfolio, is structured on four departments (biochemistry, haematology, immunology and microbiology) and it is fitted with state-of-the-art equipment, of high accuracy and precision, providing a wide, complex range of investigations.

These two projects are the result of a €1.3 million investment and it covers an area of 1300 sqm.

“We entered the Brașov market 7 years ago, after completing a transaction to take over the Quick Diagnosis Polyclinic. We continued to invest, we increased the quality of our services and the complexity of the medical act, with Brașov becoming the second business centre for MedLife. We are pleased to offer locals and people from neighbouring areas a modern medical unit, where they can have customised prevention packages and integrated healthcare services of the highest standards. We will continue to

consolidate our position nationwide both with acquisitions and with greenfield projects”, added Mihai Marcu.

MedLife Brașov Hyperclinic is located on 2 Turnului Street and it operates from Monday to Friday, between 8:00 a.m. and 9:00 p.m. and on Saturdays between 8:00 a.m. and 2:00 p.m. For information and appointments, patients can use the call centre number 0268 960.

MedLife entered the Brașov market in 2010, with the acquisition of the PDR Brașov group of companies. Currently, the MedLife portfolio includes a multidisciplinary hospital (MedLife Brașov Hospital), a maternity hospital (MedLife Eva Brașov Hospital), three hyperclinics (MedLife PDR Vulturului, MedLife PDR Turnului and MedLife Brașov), a Paediatrics Centre, six healthcare centres (Făgăraș, Sf. Gheorghe, Codlea, Bran, Poiana Brașov, Săcele), four medical laboratories (Brașov and Sf. Gheorghe) and an own pharmacy, part of the PharmaLife Med chain.

About MedLife:

MedLife is the largest private healthcare provider in Romania. The company operates the widest network of clinics, one of the large networks of medical laboratories, general and specialised hospitals and it has the largest client database for Healthcare Prevention Packages in the country. In addition, from the standpoint of sales, it is one of the largest private healthcare companies in Central and Eastern Europe, according to the public information available to MedLife Group.

Throughout its history, MedLife and the companies it controls have had over 5 million unique patients, namely around 1 in 4 Romanians. In the period May-July 2016, the Group's clinics provided services to an average of 8,300 patients every day, and its laboratories performed, on average, over 28,000 tests every day.

The shares issued by MedLife SA are traded on the spot regulated market managed by the Bucharest Stock Exchange, Premium Category, with the "M" trading symbol. MedLife Group has a successful history as regards both organic growth and growth by acquisitions. As of 2009, it has opened or acquired 83 medical units. Its strong and experienced management team has been capable of creating and managing these growth opportunities, acquiring valuable knowledge and experience, which can allow finding the best way to continue expanding successfully.
